

ePACT is here!

ePACT replaces M-NASR's annual Participant Information Form

M-NASR is proud to announce the implementation of ePACT Network, a health and safety software designed to give program staff easier access to participant emergency contact information. It will also provide more convenience to participants and families – instead of completing our annual Participant Information Form every year, the ePACT form only needs to be completed in full once online and then updated as needed!

What is ePACT?

ePACT is a tool that organizations like park and recreation departments, YMCAs, sports associations, schools, daycares, employers and municipalities use to collect important emergency information that was formerly collected via paper forms. It helps make sure the data is in the right hands at the right time.

Why are we using ePACT?

- To save you time – With ePACT, you only need to complete your information once and then just verify that it is still correct for additional programs or annually. And if you need to update something quickly, log in and update it, and M-NASR will be notified immediately.
- For better security & privacy – ePACT's high encryption levels and commitment to security means your data on ePACT is safe and will be readily available in case of an emergency.

How does ePACT work?

- You'll receive an email invite to share information with M-NASR.
- Click 'Complete Request' to create a free account or log in if you already have an existing ePACT account.
- Enter the required information, like medical conditions, emergency contacts and additional participant related information. It will then be shared with M-NASR so that program staff have access.
- ePACT makes it far easier for you to share emergency information with us while also ensuring we have access to records anytime.
- Rest assured that you always own your account and the information in it.
