

## Why Can't I Go?

Right now, there is a new kind of sickness called the Coronavirus. The germs of this virus are making a lot of people sick. These germs are very easy to catch. If I catch this germ, I could get sick.

The people in my town are trying to not get sick. The best way to stay healthy right now is to try our best to not be around too many people, so we don't catch the germs or make anyone else sick.

I can't go to my favorite places because we don't want to spread the Coronavirus germs. It is best for us to stay and play at home. I also need to keep washing my hands with soap and water. This will help keep everyone healthy.

When the Coronavirus virus germs stop making so many people sick, I will be able to go back to my favorite places and be with my family and friends. Things will be different. I may need to wear a mask and we will need to take turns. I will keep 6 feet distance and wash my hands with soap and water. This will help keep people healthy.
